SWEET CORN

Golden Cross Bantam

This new disease resistant corn fills a long felt want in localities where corn is affected with bacterial diseases. It is extremely hardy and very productive, producing more and larger ears than Golden Bantam. The quality is extra fine. The ears are larger than Golden Bantam and more freely produced and about as early. Pkt. 8c; ¼ lb. 15c; lb. 45c; 2 lbs. for 85c.

TOMATO Break O'Day

The Most Solid of the Extra Early Varieties—Disease Resistant

It is a cross between the well-known variety Marglobe and another variety. It is greatly disease-resistant and is the same shape, color and size as Marglobe but much more solid, and is 10 to 12 days earlier in ripening. This means that Break-O'Day will ripen along with Bonny Best and the other extra early tomatoes, but excels them greatly in size, solidity and seedlessness. Pkt. 10c; oz. 40c; ¼ lb. \$1.25.

"BUTTERCUP" Squash

The Hardest and Sweetest Squashes Grown.

Because North Dakota could not raise sweet potatoes, its plant breeders set about developing a substitute. The Buttercup Squash was the answer—after 10 years of work. It is now a popular garden crop over the Northwest. Each squash weighs from three to five pounds. The flesh is a deep rich orange, mild and sweet in flavor. In baking tests comparing eight varieties of squash, Buttercup rated highest. Delicious was second, and True Hubbard was third. The Buttercup variety withstands drought especially well. Pkt. 10c; oz. 20c; ¼ lb. 60c.

CAULIFLOWER

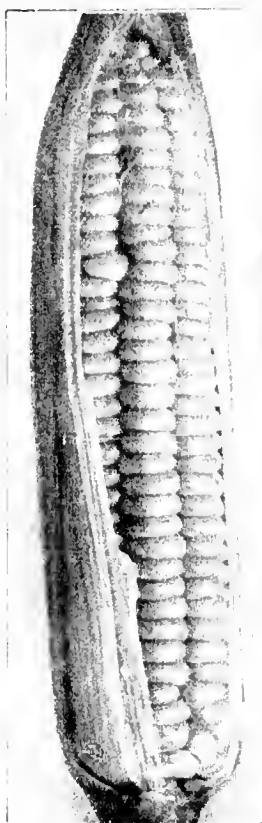

Super-Snowball

The finest, earliest, most profitable cauliflower variety in existence. Given good soil, and proper care, Super Snowball can be harvested and out of the way before ordinary varieties are ready to cut. The heads are large, the leaves quite large and curl over the head for protection from the sun. This seed is the originator's strain. Pkt. 10c; ¼ oz. 65c; oz. \$2.25.

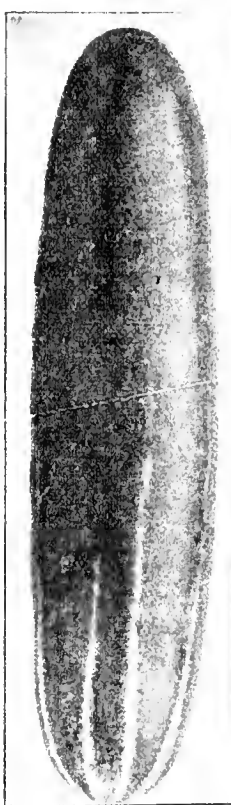

RADISH Glowing Ball

Won Gold Medal Award. All American Selection.

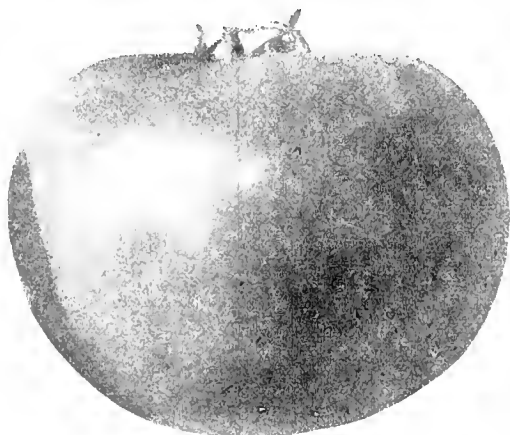

An excellent home garden or forcing radish, perfectly round, about 1 in. in diameter, with a small top and a thread-like taproot. The skin is a bright fiery scarlet-red with a suffusion of orange which gives it a glow all its own. The flesh is white, crisp and delicious. The roots are fully developed in from 20 to 25 days. Germination Tests

The seeds offered in this catalogue were grown this last season (1935), After they are harvested and properly dried we test them to see if the vitality is good, discarding any which show low germination, after this we put them in packages for sale. This must be done in Oct. Nov. and Dec. 1935 so as to be ready to fill orders by Jan. 1936. On each packet we mark the approximate germination and date of the test or year the seed was grown. If seed tests between 90 and 100 per cent we mark it approximately 90 thus allowing a little for possible deterioration by planting time.

Where are Seeds Grown?

All seeds cannot be grown successfully in one locality. To produce a perfect crop, a variety must be grown where it develops best. Nearly all the carrot, lettuce, onion and sweet pea seed used is grown in California. Most of the Muskmelon in Colorado, the Watermelon in the south. Many choice flower seeds have to be grown in Europe, etc. We have good growers where seeds can be grown to the greatest perfection.

Selected Tomato Seed

John Baer Tomato

Best Early Tomato on Earth

This wonderful, large, beautiful, early Tomato has produced a crop in 30 days from well matured plants. It is of most perfect shape, of glistening, brilliant red color. Extra solid, heavy fruit and ripens up evenly. Plants produce 50 to 100 perfect Tomatoes each. The flavor is extra fine, mild and delicious. They are very even in size, weighing 6 to 7 ounces each, extremely solid and will stand shipping a long distance. Pkt. 8c; ½ oz. 15c; oz. 25c; ¼ lb. 90c; lb. \$3.00.

Marglobe Tomato

If we could have but one tomato, we think that we should select Marglobe. It is quite early, large, smooth and wilt resisting. It is a deep globe shape and a fine rich scarlet purple making one of the prettiest varieties grown. Its table qualities are unexcelled and it is a prolific bearer. This variety was brought out by the Department of Agriculture with the idea of producing a disease resisting sort with the best possible qualities for home or market. Now largely grown for home and market. Pkt. 8c; 2 pkts. for 15c; oz. 30c; ¼ lb. 90c; lb. \$3.40.

Chalk's Early Jewel

A fine tomato, following closely the Earliana. Fruit uniformly large, solid and almost round. For a fine medium, early or main crop this is desirable. Immensely productive, handsome appearance and fine quality. Pkt. 5c; ½ oz. 14c; oz. 25c; ¼ lb. 75c; lb. \$2.75.

Bonnie Best

Earlier than Chalk's Early Jewel. A vigorous grower, enormously prolific. Color is intense scarlet. Shape is perfect and remarkably uniform in size. Ripens evenly to the stem without crack or black spot. Very productive and a fine shipper, being even in size. Pkt. 5c; ½ oz. 12c; oz. 20c; ¼ lb. 75c; lb. 2.50.

New Tomato—Oxheart

This new Tomato is aptly named because the fruits are not only shaped like a beef heart, but also when well grown are very nearly as large. The color of the fruit is a deep pink or crimson of the same shade as the well known Ponderosa, and they have the same texture and mild flavor but produce even fewer seeds. As a home garden sort it is a splendid Tomato, but we do not recommend it as a market variety owing to its immense size and poor handling qualities. Pkt. 10c; ½ oz. 35c; oz. 65c; ¼ lb. \$2.25.

Deposit Big Dwarf

Earliana Tomato

Special Selected Strain

Our strain of this first early sort is earlier and decidedly superior to much that is sold as Sparks' Earliana, and the extreme earliness of its large, smooth fruits makes it a very desirable Tomato for market gardeners, as well as desirable for the home garden. The vines are small, but vigorous and productive. The fruits are scarlet, medium to large, nearly round and exceptionally smooth for so early a variety. The fruits are borne in clusters near the base of the plant and the bulk of the crop ripens very early. Pkt. 5c; ½ oz. 14c; oz. 25c; ¼ lb. 90c; lb. \$3.00.

Deposit Big Dwarf Tomato

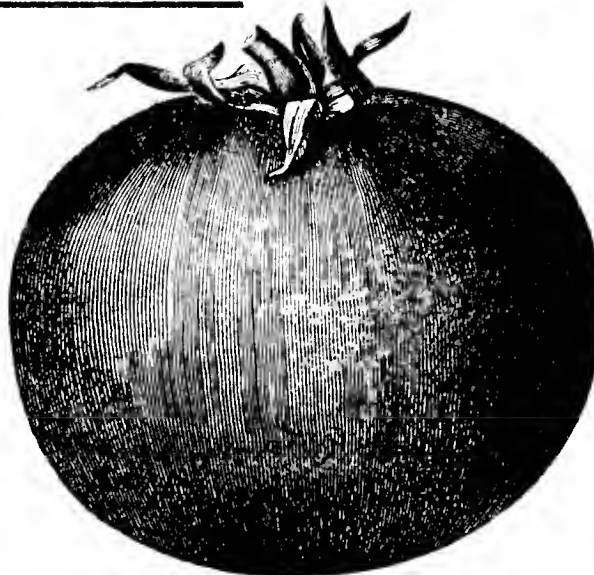

Plants are stocky and bush-like, holding an abundance of fruit well off the ground on their strong stems. Can be planted much thicker than the straggly varieties. Fruit very large and of a purplish crimson color. It is the largest fruiting tree tomato grown. Pkt. 10c; ½ oz. 22c; oz. 40c; ¼ lb. \$1.25.

June Pink Tomato

June Pink Tomato is often called Pink Earliana. Early as Earliana and an enormous bearer. The fruit is of medium size, uniform, smooth and excellent for shipping. Color is a bright, pleasing pink. Pkt. 5c; oz. 25c; ¼ lb. 85c.

Earlibel

Marglobe Tomato

Pritchard or Scarlet Topper

Vines vigorous producing a big crop of good sized, solid tomatoes of excellent quality. Color a bright red with thick firm flesh. Medium early. If you want an extra good tomato for home or market, here you are. Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.20; lb. \$4.00.

Earlibel Tomato

This improved variety is as early as Earliana and larger. It is a wonder compared to most sorts. Fruit large, 3 to 4 inches in diameter, smooth and solid, with few seeds. Never cracks, it is very hardy and productive, and vines are loaded with bright, glossy red fruit. Pkt. 10c; ½ oz. 25c; oz. 35c; ¼ lb. \$1.25.

Crimson Cushion

This variety is often sold for "Beefsteak." It is larger and later than our Beefsteak Tomato. Very similar to Ponderosa except color which is a deep crimson scarlet. Tomatoes are very large, smooth and solid and of fine flavor. Although rather late it continues bearing until killed by frosts. Pkt. 8c; 2 pkts. for 15c; oz. 40c; ¼ lb. \$1.50.

Albino or White Beauty

A pure white Tomato with white flesh and mild flavor. No trace of acid. Can be relished by people who could not eat an acid variety. Very mild when eaten raw. About the size of Stone Tomato. Pkt. 10c; 3 pkts. for 25c; oz. 40c; ¼ lb. \$1.50.

Burbank Tomato

Mr. Luther Burbank considered this one of his greatest triumphs in horticulture. Many of our customers write us that it does wonderfully well with them. It is a fine all-around variety which matures early. Pkt. 6c; 2 pkts. for 10c; oz. 25c; ¼ lb. \$1.00.

GREATER BALTIMORE Tomato

A GREAT CANNER AND SHIPPER
Outyields All Other Tomatoes by
Actual Test

This is one of the greatest canning tomatoes grown. Fruit very large, smooth, well-formed and deep. Extra firm, solid, and heavy, ripening up crop evenly to stem; free from ridges, cracks and blight. It will yield more than any other Tomato and is one of the best shippers grown. Color beautiful brilliant red. Plants vigorous and compact, producing enormous clusters of fruit. Tomatoes often weigh 2 pounds each. 400 to 600 bushels of fruit have been produced on one acre. Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 65c; lb. \$2.20; 3 lbs. \$5.00.

Ponderosa Tomato

A purplish pink, main crop Tomato of the largest size. The vines are vigorous and very productive. The fruits are very solid, with exceptionally few seeds, fairly smooth and considered of very good quality, especially by those who prefer a Tomato quite free from acid. It is very desirable for slicing. Pkt. 8c; 2 pkts. 15c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.25; lb. \$4.25.

Yellow Ponderosa

This magnificent variety is similar to the Red Ponderosa except in color. Very solid, mammoth size and when sliced, contrasts prettily with the purplish red of the old Ponderosa. Fruit very uniform, contains few seeds and is very solid, heavy and of the finest quality, being almost free from acidity. Pkt. 8c; 2 pkts. for 15c; oz. 30c; ¼ lb. \$1.10.

Golden Golossal

The Best Big Yellow Tomato

As the name implies this is a mammoth yellow Tomato. Fine form, solid, meaty. These big yellow fellows receive admiration; size, fine golden, glossy appearance and great excellent quality, make them favorites for home. Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.85.

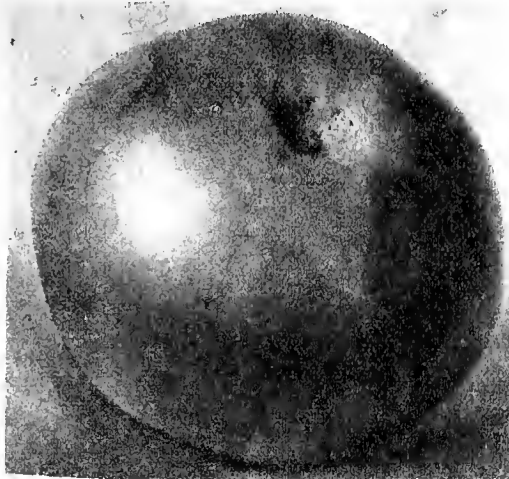

Beefsteak Tomato

(An Improved Matchless)

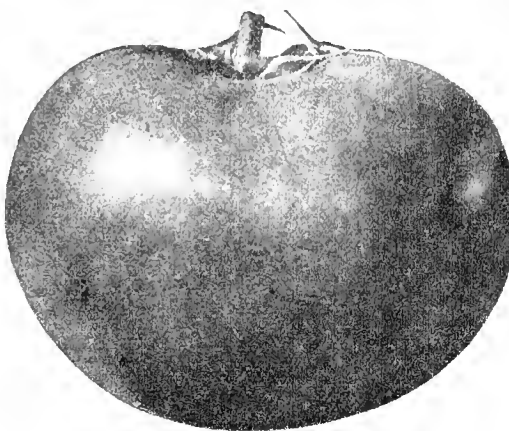

The name Beefsteak has been given to several Tomatoes, which are especially noted for a solid, meaty core and unusually large size. The Beefsteak Tomato possesses these good points—heavy, solid, fine flavored, meaty flesh, etc., and is, we think, one of the best varieties grown. Vigorous grower, very productive and continues to produce large sized fruits until frost. Its luscious fruit is large to extra large, very meaty and solid, with few seeds. Its color is a brilliant shade of red and one of the most beautiful Tomatoes we have ever seen. Foliage heavy, protecting the fruit from sunscald during late summer. Pkt. 7c; ½ oz. 15c; oz. 25c; ¼ lb. 70c; lb. \$2.50.

Livingstons Globe

Very firm fleshed, with few seeds, ripens evenly. Color a very fine glossy rose, tinged with purple. Flavor is extremely delicate and agreeable and the plants are extremely productive, being loaded throughout the season. Pkt. 5c; ½ oz. 13c; oz. 25c; ¼ lb. 80c.
